- Accommodation on the last night of your tour.
- Fishing Equipments and other related tools

Short Notes

Climate

The mean minimum and maximum annual temperature ranges from 8C - 35C respectively. Much of the country receives between 1,000 and 1,500 mm of rainfall per annum. The south of the country has two rainfall peaks in April - May and October - November. This pattern however becomes less marked towards the North. Of recent there have been changes in rainfall patterns raining in July, making November dry.

Clothing

Depending on the weather, heat and your resistance to the sun, you could bring a mix of T-shirts and long-sleeved as well as lightweight shirts. Similarly, it is OK to wear shorts in most situations, but light-weight, washable trousers (especially those that convert into shorts by unzipping legs) are recommended. We will be at high altitudes for much of the tour, so evenings and early mornings could be chilly especially in Ssesse Islands. A light sweater/sweatshirt for cooler evenings and a light, easily packable rain shell are advised. Neutral colours (grays, tans, and khakis) are most appropriate for forest birding. Easily washable, quick-drying clothes are useful. There will be walking in the fish villages so some ankle-supporting walking shoes with a good grip are advised. Bring a sunhat and sunglasses. Casual clothes are adequate throughout.

Visas

Visa is required for USA citizens. It is supposedly possible to obtain them on arrival, but you can choose to get it before you go. Bills with years reading 2006 and above are widely acceptable.

Equipment

You can carry your fishing equipments for reliable fishing but we provide the team with all the necessary equipments. A small daypack for carrying your essentials in the vehicles on walks is essential. You should bring all the camera equipment and spare batteries and film you need (especially if still using slide film), as these can at times be difficult and costly to purchase. There should be good photographic opportunities. Bring a small flashlight as some lodges don't use electricity or may run on generators that may be switched off in the middle of the night.

Health

Bottled and purified water is available throughout. It is supplied during the day's activities and is available for purchase with evening meals. You will need sunscreen and a small amount of insect repellent. For hygiene and quality, you may want to bring whatever remedy you prefer or are prescribed for upset stomach. Moist towelettes can be a pleasant way of keeping refreshed and clean en route. Lodges do have emergency medical kits and some lodge shops stock basic, well-known drugstore remedies for headaches, painkillers etc. However, bring your own supply of any medical/pharmaceutical items they need or have prescribed, as these may not be available.
